

LCN-MKO

Sample- and Training Case

Contents:

Software:

LCN-PRO full version
incl. free updates

LCN-W building visualizing Demonstration version
(handed out during training)

Hardware equipment:

Module:
LCN-UPP
LCN-SH+

Coupler:
LCN-PK

Remote Control:
LCN-RT
LCN-RR

Coupler for Key Converters:
LCN-T8

Attachments:
USB adapter, cables, connectors and documentation

Description:

The LCN-MKO is the training case of the LCN bus system. Thanks to the wide-ranging basic equipment with two intelligent bus modules, key interface, remote control and IR receiver as well as to the couple-module and the software LCN-P, there is a guaranteed easy and safe start into the world of LCN.

Field of application:

With the LCN-MKO it is possible to build up a small system and get familiar with the technology. The LCN bus system is especially suitable for all fields of building automation and is fully transformable according to the requirements of the corresponding building. So the system can be used for private house building purposes, functional buildings, industry and trade up to high-rise buildings and in specially-used areas.

Note:

This partner offer is only valid for specially-skilled electricians. One training case is offered to each company.
